The First Name In Trailers®

Composite Plate Rear Doors

Designed with a polyethylene core and steel skins, these light weight plate rear doors are durable and moisture resistant, delivering longer door life.

Roll Up Door Installation

Roll up doors from most manufacturers are readily available and will be factory installed in order to meet the needs of your operation.

Composite Floor Systems

Built with a fiberglass layer on the underside of each plank, the high strength composite design supports heavier payloads and decreased moisture entry in to the floor.

Heavy-Duty Aluminum Floors

This heavy-duty, light weight aluminum floor is more durable, and it delivers added payload capacity, reduces trailer weight, and extends floor life.

Custom Wearbands

Heavy-duty aluminum, fiberglass reinforced plastic and HDPE plastic options are available to fit your operation's durability requirements.

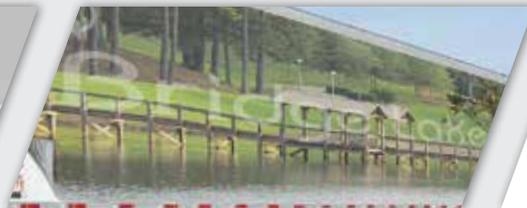

Double Deck Solutions

Optimize trailer payload capacity by efficiently using the full inside height of the trailer—increasing cargo versatility and transportation efficiency.

Clearance Light Packages

An array of LED clearance light models and configurations are available to meet the specific needs of your operation.

Factory-Installed Decals

The highest quality decal installation available is completed at our factories so your trailer is ready to operate as soon as you pick it up.

EPA SmartWay® Certification

A SmartWay certification decal makes it easier to identify a trailer as CARB-compliant, creating less paperwork and downtime at checkpoints.

USS-120A-4 Aerodynamic Side Skirt

PATENTED SAE tested and SmartWay® verified to attain better than 5% fuel savings, it is also CARB-compliant when used with low rolling resistance tires.

Aluminum & Steel Side Wall Post System

Alternating steel and aluminum side wall posts reduce weight and deliver a higher payload capacity.

Severe Service Kingpin Section

Engineered with a thicker approach plate and Kingpin plate, this design minimizes damage during heavy-duty service operations, reducing repair costs.

OPTIONS TO SET YOUR OWN STANDARD

The First Name In Trailers®

Approach Plate Reinforcing Angle

The approach plate reinforcing angle gives added front wall protection, reducing maintenance costs while promoting longer trailer life.

Stainless Steel Vertical and Horizontal Dock Bumper

Easy-to-clean, corrosion resistant stainless steel dock bumpers create a clean look that increases resale value and extends trailer life.

Pintle Hooks/Doubles

For better operating efficiency, pintle hooks are available for single axle, turn pike double and Canadian C-Train style dual pintle hook trailer operations.

Wide-Track Suspension for Wide Base Tires

This suspension system is for use with single wide base tires, and it features 6" wider spring centers for greater stability and improved tracking.

Disc Brakes

This brake system reduces brake fade, increases braking performance and improves safety—creating shorter, more stable stopping distances.

Translucent Roof Skins

A fiberglass reinforced plastic roof skin heightens visibility inside the trailer, improving safety and efficiency during loading and unloading.

Anti-Dock Walk Devices & Dump Valves

A variety of anti-dock walk devices and dump valves may be used to stabilize the trailer during loading/unloading, creating a safer work environment.

Tire Inflation Systems

Choose one of our recommended systems and maintain optimum tire pressure in order to increase fuel economy, improve safety and maximize tire life.

Skylights & Domelights

Skylights and domelights enhance interior trailer visibility, improving safety and efficiency during loading and unloading.

Tri-Axle Suspension Systems

Tri-axle suspensions with 49", 60" and 72" spread axles provide higher payload capacity.
