

The First Name In Trailers®

UTILITY'S ADVANCED SIDE SKIRTS

This unique patented design provides long term durability

Utility side skirts have a unique bracing system that allows the skirt to flex both inward and outward providing the operator best in class durability. The galvanized high tensile steel braces are virtually indestructible and unlike others can simply be “bent” back to their original shape if damaged. The UV protected Fiberglass Reinforced Plastic (FRP) construction of the skirt gives exceptional lifetime performance. The forward edge of the skirt is securely bolted with a “spring” attachment at the support leg assembly to reduce impact damage. Increased ground clearance reduces impact potential while maintaining the “advanced” trailer skirt designation.

EPA SmartWay® Verified
California Air Resources Board Compliant**

UTILITY SIDE SKIRT 120A-4

features

SmartWay® Verified

The next generation USS-120A-4 Side Skirt is SAE tested and SmartWay verified to achieve greater than 5% fuel savings*.

CARB Compliant**

When used with low rolling resistance tires, the USS-120A-4 enables Utility trailers to achieve CARB (California Air Resources Board) Compliance, which currently are the strictest standards in the industry.

Utility Tested and Approved

Utility puts the USS-120A-4 through rigorous real world tests to ensure that it will have the strength and durability to stand up to everyday wear and tear.

Best-in-class Warranty

Utility offers an industry leading 5-year warranty because we are confident that the USS-120A-4 is strong and durable, exceeding current industry standards.

Factory or Dealer Installed

Designed for factory or dealer installation, Utility Advanced Side Skirts deliver the highest level of performance.
